

HONDA 1981 ATC[®] 70

You don't have to be grown-up to have grown-up fun.

Being a kid isn't always easy.
You're just the right age to enjoy a good time.
You're the right size. You've even got the time.

But the big guys get all the best toys.
Big cars. Big bikes. Big everything.

Big deal. There's one grown-up toy that's just the
right size for kids. The Honda ATC[®]70. Son of the
original all-terrain trike. Little Red.

But even though the ATC70 costs less than some
10-speed bicycles, it definitely isn't kid stuff. It's powered
(and we do mean powered) by a torquey 72 cc four-
stroke. An engine that has proven its performance and
reliability over 8 years of ATC[®] boondocking.

An automatic clutch and thumb operated throttle
make it easier to operate the ATC70. There's a throttle
stop adjustment, so you can set maximum speed to the
experience of the rider. And big, fat flotation tires mean
you can ride it all over the place and have a ball doing it.

And even though the ATC70 is just the right size
for kids, it's tough enough for many kinds of riding fun.
With the kind of no-nonsense guts that comes from over
10 years experience in the toughest proving grounds
of all—the real world.

The original Honda ATC70. You don't have to be a
kid to enjoy it, but it doesn't hurt.*

*Maximum load capacity 150 pounds.

Specifications 1981 ATC®70

Engine..... 72 cc OHC four-stroke single
Bore and Stroke 47 mm x 41.1 mm
